## About Me

Hey i'm **Zin Kyaw Moe** but everyone call me BJ, so you can also **call me BJ**. I'm From Myanmar. I have started my carrier on the very first of 2021 and now it is 2023, time has gone by so fast. In 2 years of times i had a chance to learn a lot from my senior developers and i want to say thanks to all of them because i'm here because of them . I work as a full stack developer along my journal and i really love to do it. But when it come to frontend, i feel like i got two brains :). I believe that every have their super power, and my super power is that **i'm the person who is super active, always hungry to learn new things and take responsibility**.

## Skills

Wasn't sure what the best way to present my skill-set was as I didn't want to list a bunch of buzz words here. So I will just list some of the tools and frameworks I'm currently using:

## Experiences

### Befeni GmbH

Full Stack Web Developer  
Bangkok, Thailand  
August 2022 - Present ( 5 months )

Befeni GmbH is a fast growing German startup that produces custom personalized shirts built to order in Thailand and then shipped to our customers abroad. At every step in the process, customers can keep track of their shirt through their phone and have input into their order. As a full stack developer for Befeni. I have to maintain existing code, finding bugs and writing the web services and API end points. Even if i'm a full stack developer, i have spend most of the time in front-end, such as developing new user-facing features, determining the structure and design of web pages, building reusable codes, optimize page loading times, and using a variety of markup languages to create the web pages as well as the integration with back-end. In this Company i got a chance to learn writing proper documentation, creating plans for our progress, and the best thing is i have got a chance to learn english and speak every day.

More details on next page

## Bilions

Full Stack Web Developer  
Myitkyina, Myanmar  
October 2021 - June 2022 ( 8 months )

Bilions is a Myanmar base Company, we provide services to IT Software Companies and Telecommunication Companies to build mobile app, web app, web landing page, and also give award-wining UI/UX designs. My role in this company is to oversee a team of developers working on building and maintaining our IT solutions. And Writing API end points and integrate with front-end, in this company i have got a chance to learn flutter from my colleague and build some excellent mobile apps.

## Proptexx

Full Stack Web Developer  
Bangkok, Thailand  
Jan 2021 - September 2021 ( 8 months )

Proptexx is a growing Real-Estate services company base in Singapore. They provide a bunch of AI services to their customers, who want to start their business as a Real-Estate agent such as optimizing images, renovation, .... And also this is the company who give me a lot of hope in my first step as a professional web developer. As a junior developer in this company i have to write a bunch on landing pages and build some admin dashboard as well as writing API end points and integrate it to front-end. And i also got a lot of chance to learn from my senior developer
